APPLICATION SUBMITTAL REQUIREMENTS

Include the following information with your Annual Report Form

- 1. **Three legible full section aerial photographs** of the site with the parcel boundaries clearly identified. These aerials are only necessary if a more recent version has become available since the last annual report submittal on file with Resource Protection. Aerial photographs are available from Sarasota County Mapping and Surveying, or the Sarasota County Property Appraiser's Office, and must be the most recent available copies.
- 2. **Three copies of the permitted plan drawing** showing the current limits of the permitted earthmoving activities and the proposed limits for the coming permit year, including the distances between required preserved native habitats and current and proposed excavation limits.
- 3. **A written report** according to the format in Attachment 1, "Annual Report Format", containing sufficient detail to demonstrate that the applicant has complied with all applicable ordinance regulations and individual permit conditions. Further, at the end of the report a table shall be provided containing the following information for each of the below-described activity (ies) authorized by the permit:
 - a. **excavations:** an estimate of in-place earthmoving volumes (cubic yards) during each of the previous permit years and coming year;
 - b. **stockpiling:** an estimate of the volume (cubic yards) of material currently stored on-site;
 - c. **hauling:** an estimate of the volume (cubic yards) of material hauled on-site and off-site during each of the previous years that the permit has been active and for the coming year;
 - d. **filling:** an estimate of the volume (cubic yards) and type of material utilized to fill the site during the each of the previous permit years and coming year.
- 4. **Provide original bond or bond renewal documents** stating that adequate, valid bonding is in place through the next permit year, to ensure continued compliance with all the terms and stipulations of the permit.
- 5. **Any other information** that may have been previously or is currently requested by the Board of County Commissioners or the Ordinance Administrator to assist in their review of specific compliance concerns.
- 6. **PUBLIC HEARING REQUIREMENTS**
The Board of County Commissioners could deem necessary a public hearing prior to approval of the Annual Report, in accordance with Sections 54-345(j)(3), 54-345(j)(4), 54-345(j)(5), and 54-345(j)(6), of the Sarasota County Code. If that would be the case, an additional set of requirements related to the public hearing will be provided by Resource Protection office.

ATTACHMENT I – SAMPLE ANNUAL REPORT FORMAT

Requested in Item No. 3 of the Annual Report Application Submittal Requirements in Page 2

Stipulation No. 1: All operations shall be conducted in accordance with the provisions of Chapter 54, Article XII of the Sarasota County Code.

All operations are being conducted in accordance with the provisions of Chapter 54, Article XII of the Sarasota County Code.

Stipulation No. 2: No organic or inorganic material (Types C and B fill, respectively) shall be buried or stockpiled on-site unless specifically approved by this permit, as may be amended by the Board. Locations for stockpiling of on-site vegetative landclearing debris (Type C fill) are shown on a site plan, date stamped November 21, 1990, and are hereby approved by this permit. The final disposition of any Type C fill on-site shall be addressed as part of a closure plan in accordance with Section 54-345(j)(10) of the Sarasota County Code.

No organic or inorganic material was buried or stockpiled on-site. Closure activities are being completed with on-going excavation (i.e., slopes are graded and seeded as the pit is excavated). The littoral shelf is currently under construction (see attached plan).

Stipulation No. 3: The permitted hours of on-site operations and hauling off-site shall be from 7:00 a.m. to 6:00 p.m., Monday through Saturday. Upon request by the permittee, night time operations (after 6:00 p.m.) associated with County, State, or Federal roadway projects may be approved by the Ordinance Administrator without a public hearing for periods not to exceed two weeks. There shall be no earthmoving operations on Sundays.

All pit-mining operations were conducted between the hours of 7:00 a.m. and 6:00 p.m., Monday through Saturday. As approved by the Ordinance Administrator, operating hours for the asphalt plant were extended beyond 6:00 p.m. during the months of April, May, and June.

Stipulation No. 4 If plant cover of native vegetation within mitigation areas falls below 85% at the end of any year during a three year period, supplemental planting shall be required. Additional monitoring may be required if coverage falls below 50% at the end of any year during the three year period.

Vegetative cover by native plant species fell below 85% this year. Supplemental planting will be completed in June of this year in accordance with the commitments of the submitted monitoring report.

Excavation limits for the 2002-03 and coming 2003-04 operational years are shown on the attached site plan. The estimated volume of Type A fill to have been removed from the approved mining limits during operation under the subject permit is as follows:

Operating Year Volume (in-place cubic yards)

2000-01	30,000
2001-02	55,000
2002-03	60,000 (total excavated volume)
	35,000 (remains stockpiled on-site following excavation)
2003-04	<u>65,000</u> (proposed)
Total:	210,000 (i.e., < 15,000,000 limit authorized by the subject permit)
