Dear Customer

To protect your drinking water from harmful contaminants, Sarasota County Utilities, in cooperation with the State of Florida, has implemented the Cross-Connection Control Program under Sarasota County Ordinance 89-19.

Florida Department of Environmental Protection requires that residential customers comply with the ordinance by installing backflow prevention devices on water service lines(s) adjacent to their water meter(s) and having them tested and certified annually. Having your backflow assembly tested and certified annually will help protect your community's drinking water.

Recent results of backflow testing on your assembly unit indicate it has failed to pass required certification. Please contact a licensed plumber and make arrangements to have the assembly repaired and retested. Your tester should mail the results within 30 days after the test to Sarasota County Environmental Services Utilities, 1001 Sarasota Center Blvd., Sarasota, FL 34240. A fax copy can also be sent to 941-861-0528.

Please request a copy of the test results for your records. If you have any additional questions about backflow preventers or cross-connection control, contact the Sarasota County Call Center at 941-861-5000 and ask for backflow prevention.

Respectfully,

Douglas E. Bailey
Cross-Connection Control Coordinator
Sarasota County Utilities

Kevin Oatman
Environmental Inspector
Sarasota County Utilities
