...no matter what.

Benefit Update: Cancer Support Services

No one can see what tomorrow will bring. But, it does help to know that, if a cancer diagnosis occurs, you'll be taken care of. Sarasota County Government has added a new benefit to the company's healthcare plan: cancer support services from Biologics, Inc.

This new benefit is in place to support members of the healthcare plan who have a cancer diagnosis by assisting the member from the point of diagnosis and throughout treatment.

From coping with severe side effects and complex dosing regimens to managing overall concerns about recovery, cancer patients require special support during their course of treatment. Biologics, Inc.'s cancer support services address these issues with personal communication telephonically from an expert care team who helps the patient successfully navigate his or her disease between physician appointments.

"I am so excited to be done with my treatments. Thank you for all you've done to help me get through this."

—54-year-old woman with head and neck cancer

Members are automatically enrolled in the cancer support services program should they require chemotherapy treatment for cancer. It is important the member's treating oncologist call Biologics at 800.983.1590 prior to chemotherapy administration. If you have any questions regarding this benefit, please contact Biologics Monday through Friday between 9 a.m. and 6 p.m. EST. at 800.983.1590 and an Oncology Nurse Specialist will assist you.
