

Annualization Factor Calculation

September 18, 2009

- 1) Average Weekday Ridership x 256
- 2) Average Saturday Ridership x 51
- 3) Average Sunday Ridership x 52

Add 1,2 and 3, divide by the average weekday ridership

- 1) $8,442 \times 256 = 2,161,152$
- 2) $6,380 \times 325,380$
- 3) $1,409 \times 52 = 73,268$

$$2,161,152 + 325,380 + 73,268 = 2,559,800$$

$$2,559,800 / 8,442 = 303$$
