

Business Trash & Recycling

Recycling Education

Let your staff know about recycling and what is recyclable is critical to making your recycling program successful.

Sarasota County staff are available to assist you in your education efforts (see *Recycling is easy as 1-2-3*, below). Call 941-861-5000 and ask for the Recycling Program.

Post the Paper Recycling and Commingle Recycling posters around your facility to help increase awareness about recycling.

For more comprehensive information about recycling, refer to the Commercial Solid Waste Guide or the Make Recycling Your Business brochure.

Recycling is easy as 1-2-3:

1. Call today for a free audit. We will:

- Assist you with determining what is in your garbage container that could be recycled.
- Assist you in reducing the container size and/or number of pickups needed for your garbage.
- Provide you with guidance and materials to help you promote and inform your employees about your recycling program.

2. Start separating your waste.

- One container for garbage.
- One container for paper recyclables and cardboard.
- One container for glass, plastic, and metal recyclables.
- You may not need all of these containers. Your waste audit can determine the number and types of containers that you will need.

3. Decide how to get your recyclables to a recycling center.

- It's your choice to have a company pick up your recyclables or you can take them to a recycling center yourself.
- Share the cost of a recycling hauler service with adjacent businesses.
