

WATER QUALITY SUMMIT

Chuck Walter has been leading the Sarasota County Stormwater Environmental Utility since March 2018. Before then, he worked in a variety of roles for the South Florida Water Management District, Florida Department of Transportation and City of Tampa among others. He has worked on a statewide evaluation of septic systems, Everglades stormwater treatment, sinkhole issues, regional surface water management programs, long-term water supply planning and hydrologic models. Chuck is a professional geologist and has authored numerous publications and held leadership roles on many state and national technical advisory committees. He is the proud father of two great kids and a combat veteran, having served with distinction during various Middle East conflicts.
