

WATER QUALITY SUMMIT

Michael Mylett holds a bachelor's degree in public health from Indiana University and a master's degree in business administration from Webster University. Michael has more than 20 years of professional experience in the wastewater industry. His experience includes design and regulation of decentralized wastewater treatment systems; compliance, enforcement and regulation development for the wastewater utility industry; and long-term water and wastewater infrastructure planning including land use impacts on the utility system. As the director, Michael oversees the Water and Wastewater Division, Engineering Division, Administrative Services/Customer Service Division, Finance Division and Solid Waste Division of Public Utilities.
