

# WATER QUALITY SUMMIT

Tom Frick has been the director of the Division of Environmental Assessment and Restoration since 2013. Tom began his career as an environmental scientist more than 23 years ago with the DEP Chemistry Laboratory. Since that time, he has worked in both the private and government sectors specializing in the areas of field data collection, quality assurance, ecological assessment, interpretation of environmental data, and waterbody restoration. Tom's focus during his tenure with the agency has been to ensure that the department uses the highest quality data, methodologies and technology to inform better environmental decisions to assess, restore and protect Florida's unique water resources. He holds a bachelor's degree in chemistry from Florida State University.
