Project Description

The Phillippi-Vamo Sidewalks project is part of Sarasota County’s Sidewalk Program, which aims to provide access to safe and convenient pedestrian facilities within our community. Construction of sidewalks in these locations will increase connectivity of pedestrian routes, improving access to services and schools while providing opportunities for physical activity and relaxation.

This project will include design, permitting, and construction of five to six foot wide sidewalks with ADA curb ramps, handrails, drainage modifications, crosswalks, lighting, and pedestrian signaling where needed to ensure pedestrian safety and sidewalk access. Some easement acquisitions may be needed to support the project needs. Sidewalks will be installed along Palm Terrace and South School Avenue, with a connection from South School to Florinda in the Phillippi location, and along the north side of Central Sarasota Parkway in the Vamo location.

Project Progress/Status

Legal Sketches & Descriptions for 7 parcels on the Phillippi portion have been submitted to the County and are being discussed by property management. 90% Plan comments submitted to EOR. PM is also still waiting on more RGB Plans from utility companies. There are already some RGB plans uploaded to e-Builder.
