## Project Description

This design-build project will deliver a range of park enhancements, including the construction of ADA-compliant playgrounds, installation of bleachers and shade structures at the volleyball and shuffleboard courts, upgrades to site furnishings, improvements to pedestrian access, stormwater management measures, and resurfacing of the existing trail.

## Project Progress/Status

A public meeting was held on March 19, 2026, where 30% plans were reviewed and community comments gathered. The design-build team will incorporate that feedback to the 75% plans for agency review.
