Project Description

The Snook Haven Improvements Project involves the creation of a new ADA-compliant food service facility, a new accessible pavilion that will offer covered seating and a view of the river, replacement of the bandshell with a new ADA-compliant version and accessible patio, a new fishing pier and associated ADA compliant parking, conversion of one of the existing cabins into an outfitter facility (canoe/kayak rental) with a public restroom, construction of accessible walks throughout the project area that will connect to the existing boat ramp and the canoe/kayak launch, and site specific themed furnishings.

The main area of Snook Haven will be closed to the public during construction for safety reasons. The boat ramp, canoe/kayak launch, and parking in that area will remain open.

Project Progress/Status

Construction site fencing, silt fence, tree & all environmental protection is in place and monitored. Existing building repairs & renovations are progressing. The fishing pier construction is ongoing. The Concessions building, Dining Pavilion, and stage are being erected. Sidewalk and site improvements are ongoing. The facility & site will remain closed throughout construction. No public access to the construction site is permitted.
