Project Description

The Siesta Beach Park Trolley Stop project involves the due diligence design, permitting, and construction administration of two new ADA-compliant trolley stops located on Beach Road. The first shade structure will take place at the existing eastbound trolley stop that occupies a prominent location at the park entrance. The primary purpose of the shade structures is to provide shaded waiting areas for the Siesta Key Trolley and Sarasota County Area Transit buses. It is the intent by this project to get a new shade structure at the Siesta Beach Park Main entrance at the existing eastbound trolley stop. The second shade structure will be placed on or near the existing westbound trolley stop located on Beach Rd at Lake House Circle FS - Stop ID: 638. This project also consists of the installation of a pedestrian crossing with Rectangular Rapid Flashing Beacon (RRFB) to enhance accessibility and safety for visitors. The goal is to provide convenient and safe transportation access for all individuals while improving pedestrian movement along Beach Road.

Project Progress/Status

Trolley Stop Location #1 – Design and permitting has been completed and it is expected for construction to start beginning of May 2026. Completion of construction is expected beginning of August 2026. Trolley Stop Location #2 –The project is in design and permitting phase and it is expected to be completed by end of June 2026. Construction procurement will commence thereafter.
